ABSTRACT

This report presents fall 1973 basic educational data on all free public elementary and secondary day schools in the United States, the District of Columbia, and the outlying areas under U. S. jurisdiction. Included are national trend data since fall 1969 on selected items of information. Detailed data, by State or other area, are also provided on the numbers of local school districts, staff, and pupils in fall 1973 as well as for the 1973-74 school year, the estimated expenditures for school maintenance and operation, and the average salaries paid to instructional staff. Data on the numbers of public elementary and secondary day schools for school year 1972-73 are also included. Most of the data also are shown separately for the 20 most populous cities. (Author)

Statistics of Public **Elementary and Secondary Day** Schools, BEST COPY AVAILABLE **Fall 1973**

HIGHLICHTS

School districts.—The decline in the number of operating and nonoperating local school districts continued, to 16,698 in fall 1973 from 16,960 reported in fall 1972.

Instructional and noninstructional staff.--About 3.7 million employees (full-time equivalents), professional and nonprofessional, were serving elementary and secondary public day schools in the United States in fall 1973.

Classroom teachers.—About 2.1 million classroom teachers, in full-time equivalents, were employed in these schools in fall 1973, an increase of approximately 1.1 percent over those in fall 1972.

Enrollment.—For the second consecutive year since school-year 1943-44, elementary and secondary enrollment, as reported in fall 1973, decreased. From fall 1972 to fall 1973 enrollments decreased by 335,000 or 0.7 percent.

Pupil-teacher ratio. -- Because the number of classroom teachers continued to increase at a higher rate than enrollment, the number of pupils per teacher decreased to the lowest on record -- 21.4.

High school graduates.—More than 2.7 million students completed the 12th grade in regular day schools during the 1972-73 school year, representing 76.5 percent of the 9th-grade enrollment 4 years earlier.

Expenditures.—Of the estimated \$56.0 billion dollars in total expenditures for public school purposes for 1973-74, \$47.0 billion was for current expenditures for elementary and secondary day schools, \$2.1 billion for current expenditures for other programs, \$5.2 billion for capital outlay, and \$1.7 billion for interest on school debt.

Estimated current expenditures per pupil.—In 1973-74, the estimated average daily attendance current expenditure per pupil amounted to \$1,116. Based on average daily membership, the estimated per-pupil expenditure was \$1,049.

Average salary.—The estimated average annual salary of the total professional instructional staff in public elementary and secondary schools in 1973-74 was \$11,185. The estimated average salary for classroom teachers was \$10,693.

INTRODUCTION

This report presents fall 1973 basic educational data on all free public elementary and secondary day schools in the United States, the District of Columbia, and the outlying areas under U.S. jurisdiction. Included are national trend data since fall 1969 on selected items of information. Detailed data, by State or other area, are also provided on the numbers of local school districts, staff, and pupils in fall 1973 as well as, for the 1973-74 school year, the estimated expenditures for school maintenance and operation and the average salaries paid to instructional staff. Data on the numbers of public elementary and secondary day schools for school year 1972-73 are also included. Most of the data also are shown separately for the 20 most populous cities.

The information was gathered in the 20th consecutive fall survey of public elementary and secondary day schools conducted by the U.S. Office of Education in cooperation with education officials of the States, the District of Columbia, and U.S. outlying areas. Descriptions of survey procedure, other methodology, and coverage appear in the section on "Nature and Conduct of the Survey." A replica of the report form, including totals for the 50 States and the District of Columbia, and instructions to respondents are shown in the appendix.

LOCAL SCHOOL DISTRICTS

Primarily as a result of reorganization laws, the consolidation and annexation of school districts, and the elimination of nonoperating school districts, the number of school districts (local basic administrative units) continued to decline. The number of school districts decreased from 16,960 in fall 1972 to 16,698 in fall 1973, down 1.5 percent. From fall 1969 to fall 1973, the number of local basic administrative units decreased by 2,471, or more than 12 percent (table 1).

Four States having more than 1,000 school districts each (California, Illinois, Nebraska, and Texas) accounted for 27.5 percent of all the districts in the Nation (table 2). Eight States ranged from 504 to 751 total school districts. The remaining 38 States each reported 451 or fewer operating and nonoperating school districts.

Of the 16,698 districts in fall 1973, the number performing their prescribed function by operating schools was 16,338, or 97.8 percent. The other 360 districts did not operate schools but provided for their pupils by other means, such as transferring them to nearby operating districts on a tuition basis.

PROFESSIONAL AND NONPROFESSIONAL STAFF

In addition to the traditional collection of the full-time-equivalent (FTE) 1/ numbers of classroom teachers, the fall 1971 survey was expanded and continued in fall 1973 to include all other instructional and noninstructional staff (also FTE), both professional and nonprofessional. Combined, they amounted to about 3,656,551 FTE school employees in the United States.

The professional instructional staff includes principals, assistant principals, supervisors of instruction, classroom teachers, teachers of the homebound, radio and television instructors, librarians, guidance staff, psychological staff, and audiovisual staff. The nonprofessional instructional staff includes teacher and library aides, secretarial and clerical assistants, and other nonprofessionals directly assigned to support instruction.

The professional noninstructional staff is composed of administrative and health personnel, social workers, attendance personnel (including visiting teachers), and other noninstructional professional personnel. The nonprofessional, noninstructional staff includes staff such as health aides; clerical, secretarial, operation, and maintenance personnel; bus drivers; and food service workers.

Instructional Staff

In fall 1973, an estimated 3.7 million (FTE) instructional and noninstructional professional and nonprofessional persons were serving elementary and secondary public day schools in the 50 States and the District of Columbia (table 3). The reported total instructional staff was estimated to be 2.7 million, which represents 73.7 percent of the total working force of elementary and secondary public school systems in the United States. Of the total instructional staff, classroom teachers accounted for 2.1 million, or 78.9 percent. Other professional instructional staff amounted to 245,340 persons, or 9.1 percent. The nonprofessional staff serving instruction amounted to 324,384, or 12.0 percent of the instructional staff.

Classroom Teachers

The estimated 2.1 million (FTE) public elementary and secondary school teachers in fall 1973 represented an increase of approximately 22,000, or 1.1 percent, over the number in fall 1972 (table 3). Since 1969, the total number of classroom teachers increased by 5.6 percent (table 1), or an average annual rate of 1.4 percent (compounded). From 1967 to 1971, the

^{1/} Full time plus the estimated full-time equivalent of part time.

total number of teachers increased by 11.2 percent. Probable reasons for the reduction in the rate of increase for these two periods are decreases in enrollment, budgetary problems, and the fact that some districts have met their quota of teachers needed.

Noninstructional Staff

The estimated FTE total noninstructional staff amounted to 961,733 employees (table 3), representing 2.6 percent of the persons employed in public elementary and secondary school systems. The professional segment of the noninstructional staff was estimated to be 103,445 persons, or 10.8 percent of the total noninstructional staff; the "other" nonprofessional group, 89.2 percent.

PUPILS

School-Age Population 2/

From October 1, 1972, to October 1, 1973, the estimated school-age population (ages 5-17 years, inclusive) declined from 51,878,000 3/ to 51,355,000, a decrease of 523,000 or 1.0 percent. During this period, the estimated total resident population increased from 208,681,000 persons to 210,298,000 persons, or 0.8 percent. The total school-age population represented a little less than one-fourth of the total population.

Enrollment

More than 45.4 million pupils were enrolled in full-time public elementary and secondary day schools in fall 1973, a decrease of approximately 335,000 or 0.7 percent, from the number in fall 1972 (table 4). The decrease from fall 1971 to fall 1972 was 337,000, or 0.7 percent. Table 1 shows that while enrollments continued to increase until fall 1971, the amount of annual increase had diminished from year to year. Historical records of the Office of Education indicate that in fall 1972, for the first time since school year 1943-44, enrollments in public schools decreased. Since the first biennial survey, begun in 1869-70, reports show that enrollments increased until 1933-34; decreased, 1935-36 through 1943-44; and increased again, 1945-46 through fall 1971. (The annual fall survey began in fall 1954.)

In fall 1973, a total of 35 States and the District of Columbia reported enrollment decreases, ranging down from less than 0.1 percent to 3.4 percent. For the second consecutive year, Arizona reported the largest enrollment increase. For the current year, Arizona reported an increase in enrollment of 7.5 percent over fall 1972, whereas the other 12 States reported smaller increases ranging from 0.2 percent to 2.8 percent. Fall 1972 data for Montana and New Jersey were not available for comparison.

^{3/} Revised from earlier estimates.

^{2/} Estimates based on data published by the U.S. Bureau of the Census in Current Population Reports, P-25 Series, Nos. 519 and 521, and unpublished data.

While enrollment in the public elementary and secondary levels combined had increased in recent years until fall 1972, the percent relationship between levels has been changing. As percent of total enrollment, elementary enrollment has continued to decline while the secondary enrollment has increased, except for a slight reversal in fall 1971. This slight deviation may have been due to changes in State reporting methods and reclassification of the seventh and eighth grades between elementary and secondary levels. (table 1)

Table 4 gives enrollment by organizational level of the school. Grades 7 and 8 were to be reported either in the elementary or secondary level, depending upon the organization of the school of which they were a part.

Table 5 shows enrollment by grade arranged within the traditional grade groups of preprimary (including nursery and kindergarten) through grade 8 and grades 9 through 12. Beginning in fall 1971, the survey requested data on the number of elementary and secondary pupils enrolled in special education. The total number of special education pupils in membership accounted for approximately 2 percent of the total number of pupils in membership.

Enrollments in Grades 7 and 8 by Organizational Level

Most States have been able to report the number of seventh—and eighth—grade pupils by the types of schools they attend—elementary or secondary. In the fall 1973 survey, 28 States furnished such information (table 6). Enrollment in this group of States comprised 48.4 percent of the Nation's total enrollment; 64.7 percent of their seventh—graders and 67.8 percent of their eighth—graders were reported in secondary schools.

Pupil-Teacher Ratios

In recent years, the teaching staffs have been growing at a slightly higher rate than enrollments. Consequently, the national pupil-teacher ratio based on enrollments has decreased to 21.4 pupils per teacher in fall 1973 (table 1) from 27.7 reported for fall 1954. Data in table 7 for fall 1973 show the national ratio based on average daily attendance (ADA) to be 19.8 pupils per teacher.

At the national level and even at the State level, pupil-teacher ratios have only limited value and should be used with caution. The average number of pupils per classroom teacher, often used as a measure of teacher workload, is not a valid measure of average class size. Furthermore, pupil-teacher ratios do not reflect the educational services provided in varying degrees by staff outside the classroom. The ratios shown in table 7 serve only as rough guidelines in studying the State-by-State situation, and more detailed information on other aspects of school staffing would be needed in order to make valid judgments.

HIGH SCHOOL GRADUATES

More than 2.7 million public high school graduates from regular day school programs were reported for the 1972-73 year--a gain of approximately 31,000, or 1.2 percent, more than the preceding year (table 8). States also reported 34,973 graduates from all other public school programs (e.g., evening schools and adult education programs) and a total of 190,713 persons receiving high school equivalency certificates.

In 1972-73, girls represented 50.4 percent of the total number graduated from regular public high school programs. A slight excess of female over male high school graduates has been noted over a period of years.

Although the retention rate of public high schools remains high, the percentage ratio of 1971-72 high school graduates (reported in fall 1972) to students enrolled in the ninth grade 4 years earlier was greater than the similar ratio for 1972-73 graduates. The 1971-72 graduates represented 76.9 percent of the class that entered the ninth grade in fall 1968. But the 1972-73 graduates represented 76.5 percent of the ninth-grade class in fall 1969, which may indicate a coming change in trend. Five years earlier, the 1967-68 high school graduates represented 77.6 percent of the fall 1964 ninth-grade class.

ELEMENTARY AND SECONDARY DAY SCHOOLS BY LEVEL

In fall 1970, the survey was expanded to include the number of public elementary and secondary day schools by level. In this survey, definitions of schools by type and grade were prescribed by Handbook I, The Common Core of State Educational Information 1/. "A school is defined as a division of the school system consisting of a group of pupils composed of one or more grade groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant."

The fail 1972 survey collected data on elementary schools, which normally included any span of grades not above 8, and on middle schools, which generally included grades 5 or 6 through 8. Secondary schools included any span of grades above elementary or middle schools, but not above grade 12. States vary in their classification of elementary and secondary schools. Grades 7 and 8 may be considered as elementary or secondary depending on how they are organized in the local school districts.

Results of the survey show a total of 88,864 public elementary and secondary day schools, including 62,942 elementary, 23,919 secondary, and 2.003 combined elementary-secondary schools.

^{1/} U.S. Office of Education, Bulletin 1953 No. 8, Washington, U.S. Government Printing Office.

Of the 62,942 elementary schools reported, 2,308 were middle schools and 1,475 were one-teacher schools. The middle school, although a popular emerging classification, comprised only 3.7 percent of elementary schools.

There has been a constant reduction in the number of one-teacher schools, due mainly to school and school district reorganization. In fall 1973, these schools constituted just 2.3 percent of all elementary schools. Nebraska reported the largest number of one-teacher schools: 590, or 40.0 percent of all one-teacher schools in the Nation.

Included in the count of secondary schools are 7,878 junior high, 11,550 senior high, 3,962 6-year or junior-senior high, and 529 separately organized vocational schools not included with other secondary schools.

Combined elementary and secondary schools, those organized and administered as a single unit, comprised 2.3 percent of the total number of elementary and secondary schools.

ESTIMATED EXPENDITURE AND SALARY DATA

Total Expenditures

Estimated total expenditures for all public school purposes in 1973-74 amounted to \$56.0 billion. Included in the grand total were current expenditures for elementary and secondary day schools (\$47.0 billion) and for other programs (\$2.1 billion), capital outlay (\$5.3 billion), and payment of interest on debt (\$1.7 billion). Debt retirement was not included, since it would be a duplication of expenditures made and reported in preceding years.

Current Expenditures per Fupil in ADA and ADM

The average estimated current expenditures per pupil in average daily attendance (ADA) for school year 1973-74 was \$1,116. Based on average daily membership (ADM), the estimated amount was \$1,049 per pupil.

Average Salary of Classroom Teachers and Instructional Staff

For the United States, the average estimated annual salary of classroom teachers in 1973-74 was \$10,693. An analysis of average salaries among States indicates wide differences, ranging from \$7,605 for Mississippi to \$12,850 for California. (Although \$15,667 is shown for Alaska, it is not here considered the highest, since the purchasing power of the dollar in Alaska is significantly lower than in other areas of the United States.) In addition to the averages first mentioned, New York, Michigan, and the District of Columbia reported salaries in excess of \$12,000 but not above \$12,800. In 11 States the average salary was in the range of \$11,000 to \$11,999; 7 States, \$10,000 to \$10,999; 16 States, \$9,000 to \$9,999; 10 States, \$8,000 to \$8,999; and 2 States, \$7,000 to \$7,999.

The 1973-74 estimated average annual salary of the total professional instructional staff (supervisors of instruction, principals, teachers, and other instructional staff members) was \$11,185. Aside from Alaska, the highest average salary was reported for California, followed by 23 States and the District of Columbia reporting salaries from \$10,164 to \$13,412 and the remaining States reporting less than \$10,000. One State reported that salary data were not available.

LARGE-CITY DATA

The problems of the Nation's large cities have been receiving increasing attention in recent years. Since 1962 the States have been requested to furnish separate data in the fall survey for the 15 cities with the highest total population in the 1960 Decennial Census. Beginning in fall 1971 the number of cities was expanded to include the 20 with the largest population in the 1970 Decennial Census. One of these cities, Washington, D.C., has always been included in this survey, as it is in other national surveys that cover all State jurisdictions. Data were requested from the 15 States in which the other 19 cities were located.

At the time of the 1970 Decennial Census (April 1970), the combined population of the 20 cities, ranging from 7.9 million in New York to 581,562 in Phoenix, comprised approximately one-seventh of the total population in the United States.

The 20 cities reporting for fall 1973 had 14.1 percent of the 1970 population and in fall 1973 had a combined enrollment of 4.7 million, or 10.3 percent of the Nation's public school pupils. Reported data for each of these large cities appear below the outlying areas in the appropriate tables.

NATURE AND CONDUCT OF THE SURVEY

For the 20th consecutive year the U.S. Office of Education, assisted by education officials from the 50 States, the District of Columbia, and the outlying areas of the United States, has conducted a fall survey of public elementary and secondary day schools. This report is the latest in the annual series of fall statistics on public day schools dating from fall 1954.

Data are collected on the numbers of pupils, high school graduates, and staff. Prior to the 1971 survey, statistics on classroom teachers, (in full-time equivalents) were the only staff data collected. This survey was expanded in fall 1971 to include total instructional and noninstructional staff, both professional and nonprofessional. Also included are estimated school expenditures by major purpose, average salaries of instructional staff and classroom teachers, and estimated average daily attendance and

average daily membership. Data on the numbers of local school districts, operating and nonoperating, are included in this report even though the item was not an integral part of the survey forms in fall 1973. Since fall 1970, excluding fall 1972, the survey has collected data on the numbers of public elementary and secondary day schools.

To the extent available, data are shown for each State and the District of Columbia, and estimates for missing data are included in the national totals. Data are also shown for five outlying areas: American Samoa, Canal Zone, Guam, Puerto Rico, and the Virgin Islands. Data for the Trust Territory of the Pacific Islands and the Department of Defense Overseas Schools were not received in time to be included in this report.

This survey also provides information on the school systems located in the 20 largest cities that ranked highest in total population according to the 1970 census. Data for Washington, D.C., are shown both in the State listing as one of the 51 jurisdictions comprising the total for the United States and with the large cities to facilitate intercity comparisons. Data shown for Phoenix, Ariz., are not for the Phoenix elementary and secondary school districts only but represent a composite of data for those schools located in the city limits of Phoenix.

Statistics for the outlying areas are shown separately and are not included in the national totals. In several tables, national and State totals for fall 1972 are provided for comparison. Some of the data differ from those originally published in the fall 1972 report and the advance fall 1973 report $\frac{4}{}$ because more complete data became available after those reports were issued.

The data in this report were furnished by the State education agencies on three report forms designed by the Office of Education. One of the forms requested data on pupil membership, staff, and high school graduates; another provided for reporting the number of schools by type; and the third requested estimated data for the current year on expenditures, average salaries, average daily attendance, and average daily membership. (See appendix for a facsimile of these forms.)

Each State report was reviewed for internal consistency and for comparability with information received in previous surveys, State publications, and related Office of Education studies. Letters and telephone calls were used as necessary to obtain data from respondents and to resolve outstanding questions.

^{4/} See Related NCES Publications, inside back cover.

As in any survey that employs the mail questionaire, variations in interpretation of instructions and definitions by respondents may exist. Because public elementary and secondary education is a State and local responsibility, any statistical total for the Nation as a whole reflects a composite of the heterogeneous educational practices existing in the United States. The use of standard forms and definitions in collecting the data tends to minimize these variations. To the extent that State deviations from prescribed definitions and instructions were known, they are indicated in the footnotes to the various tables.

The Office of Education encourages each State to obtain the data for its report by conducting a fall survey of local school districts and by using an adaptation of the Federal form and accompanying instructions. Many of the States used adaptations of this form; however, some State education agencies find this approach impractical for a variety of reasons; e.g., funds and staff are not available for conducting the survey, or similar data for a recent period may already be available at the State level. Some States collected the data from regular annual reports, and a few submitted estimates based primarily on records. Financial estimates for 1973-74 were prepared in the State offices generally without recourse to survey efforts. However, State appropriations and budgets filed by local school districts often served as bases for these estimates.

Data shown in some of the basic tables may not always agree with data reported in other NCES publications. The "as of" reporting dates sometimes differ from one report to another, which may cause slight variations in published data.

- NA Category exists but data not available.
- -- Quantity zero, unknown, or not applicable.

NOTES

DOD Overseas Schools are elementary and secondary schools operated in foreign countries by the Department of Defense for minor dependents of military and civilian personnel in the Department who are stationed overseas.

The Trust Territory of the Pacific Islands is administered by the United States by agreement with the United Nations Security Council.

Kansas and Wisconsin: Data for vocational schools which are not a part of the regular public school system are not included.

Ravisad from previously published data.

Estimates are included for nonreporting States.

Does not include data for columns 8 through 11.

Bus drivers and cafeteris workers other than managers who are hourly employees are not include.

Data estimated by reporting State.

Does not include columns 8 and 11.

Includes clerical and secretarial staff for both instructional and noninstructional staff.

Data for column 8 included in column 11.

Percent increase less than 9.05 percent.

Represents data as of fall 1972.

Includes teacher and library sides only.

Includes recreational specialists as well as classroom teachers.

Table 4.--Enrollment by organizational level fall 1973 and fall 1972, and average daily membership (ADM) and average daily attendance (ADA), 1973-74, in public elementary and secondary day schools, by State and in outlying areas and large cities of the United States

Includes estimates for nonreporting States except for columns 2, 3, and 4.

Ravised from previously published data.

Date for elementary and secondary are reported by specific grade group: K to 6 for elementary and 7-12 for secondary.

Data for elementary and secondary are reported by specific grade group: K to 8 for elementary and 9-12 for secondary.

Data for elementary and secondary are reported by specific grade group: K to 7 for elementary and 8-12 for secondary.

Does not include kindergarten pupils.

Data satimated by reporting State.

Less than 0.05 percent.

NA Not available

Data include nursery schools and kindergartens operated as part of the regular public school and an action.

Revised from previously published data.

Includes approximately 38,040 ungraded pupils in membership for Tucson, Ariz., for which grade level is not available.

Data for column 13 included in column 14.

Data for column 21 included in column 22.

Date for column 13 included in column 21. Date for column 14 included in column 22.

Estimated by reporting State. Data for columns 5, 6, and 7 included in column 13.

 $[\]underline{1}$ / Data satisfied by reporting State.

NOTE. --Data are shown only for States that reported a division of 7th and 8th grades in elementary and secondary enrollment. Some changes observed from year to year in part reflect changes in organization of grades by level. Some States have indicated continuing reclassification of grades by level and report data as provided by the local school districts.

OE FORM 2350-5, 5/73

PREVIOUS EDITIONS OF THIS FORM ARE OBSOLETE.

INSTRUCTIONS

GENERAL

This report is due in the Office of Education on December 15, 1973. If complete data for all local reporting units are not available in the State department of education in time to meet the due date, please forward promptly the best figures for the whole State by including an estimate for nonrespondents.

The information for this report should reflect the facts on or about October 1, 1973 or the nearest date thereto when membership can be considered stabilized.

It is important that the States incorporate in their own questionnaires all basic definitions contained in the Federal form. Where reported data do not conform to prescribed definitions, deviations should be explained.

If data have been estimated in whole or in part, please indicate the basis of the estimate.

The figures reported this year should be compared with those for last year. Reasons for unusual increases or decreases should be noted by attaching an explanation, e.g., change in method of reporting, change in standard used, etc.

SPECIFIC

- Line 1. A classroom teacher is defined as a person employedto instruct pupils in a situation where the teacher and the pupils are in the presence of each other. Radio and TV instructors and homebound teachers are to be included as classroom teachers.
- Line 2. Other professional instructional staff includes persons with assignments such as principals, assistant principals, librarians, curriculum consultants and/or supervisors of instruction, guidance staff, psychological and audiovisual staff.
- Line 3. Nonprofessional instructional staff includes such personnel as school clerks, secretaries, teacher and library aides, etc.
- Line 4. Sum of lines 1 through 3.
- Line 5. Professional noninstructional staff includes school system administrative personnel such as superintendents, assistant superintendents, business managers, etc., responsible for system-wide management of the school district, health personnel, social workers, attendance personnel including visiting teachers and other noninstructional professional personnel.
- Line 6. Nonprofessional, noninstructional staff includes such personnel as clerical, secretarial, operation, and maintenance staff. bus drivers, food services workers, etc.

- Line 7. Sum of lines 5 and 6.
- Line 8. Sum of lines 4 and 7.
- Line 9. Report the total number of 1972-73 school year high school graduates from the regular public day school program, include 1972 summer school graduates, exclude 1973 summer school graduates. If 1972-73 high school graduates exceed the 12th grade enrollment reported for fall 1972, please explain.
- Line 10. Report the total number of graduates from all other public school programs, evening school, adult, etc., during the 1972-73 school year.
- Line 11. Report the total number of persons receiving high school equivalency certificates during the 1972-73 school year.
- Line 12. Pupils should be reported by grade as "elementary" or "secondary" according to State and local practive. However pupils classified as "elementary" should not be reported in grades higher than grade 8, and pupils classified as "secondary" should not be reported in grades lower than grade 7. It is possible to report some 7th and 8th graders as "elementary" and others as "secondary" if a single classification system is not State-wide.
- Line 12a and 12b. Include only those pupils for which the prekindergarten and kindergarten programs are part of the regular school system and are financed by the LEA.
- Line 120. Report as postgraduate only those pupils who have graduated from the 12th grade and have re-enrolled for additional high school courses. Do not include pupils in grades 13 and 14.
- Line 12p. Pupils not assigned to grades should be reported as ungraded and/or nongraded. DO NOT report ungraded special education pupils here.
- Line 12q. Report only handicapped pupils served by programs specifically designed to meet the needs of handicapped children (where handicapped refers to either educable, mentally retarded, trainable mentally retarded, hard-of-hearing, deaf, speech impaired, visually impaired, seriously emotionally disturbed, learning disabled, cripple, or other health-related handicaps). DO NOT include in items 12a through 12p pupils reported here.
- Line 12s. Report here the unduplicated count, as of the beginning of the year, the total of all pupils enrolled in schools operated by local public school systems.

1973-74 STATE (or territory) NOTE. Before completing this form, carefully read instructions on reverse. SUBMIT COMPLETED FORM TO: PREPARED BY (name and title) U.S. Office of Education National Center for Educational Statistics Elementary-Secondary Surveys Branch AREA CODE NUMBER EXTENSION TELE-400 Maryland Avenue, SW PHONE Washington, D.C. 20202 ITEM AMOUNT (all data are to be estimates for the 1973-74 school year) (8000) 1. CURRENT EXPENDITURES A, FOR FILL-TIME ELEMENTARY AND SECONDARY DAY SCHOOLS (from all funds, including ESEA) B, FOR OTHER PROGRAMS OPERATED BY LOCAL SCHOOL DISTRICTS (community services, summer schools, sdult education, and junior colleges) C TOTAL CURRENT EXPENDITURES (sum of lines 1A and 1B) 2, CAPITAL OUTLAY A. BY SCHOOL DISTRICTS (from all funds, including P.L. 815) B, BY OTHER AGENCIES (achoolhousing authorities, States, countles, cities, etc.) 3. INTEREST ON SCHOOL DEBT A. BY SCHOOL DISTRICT (from all funds) B. BY OTHER AGENCIES (achoolhousing authorities, States, counties, cities, atc.) (in dollers) 4. AVERAGE SALARY OF CLASSROOM TEACHERS ONLY (in dollars) AVERAGE SALARY OF TOTAL PROFESSIONAL INSTRUCTIONAL STAFF (principals, supervisors, librarians, teachers, etc., exclude administrators) 6, AVERAGE DAILY ATTENDANCE (ADA)* (day schools estimate for 1973-74) 7. AVERAGE DAILY MEMBERSHIP (ADM)* (day schools estimate for 1973-74)

COMMENTS

OE FORM 2350-9, 5/73

^{*}THE ADA AND ADM FIGURES WILL BE USED TO COMPUTE THE AVERAGE CURRENT EXPENDITURE PER PUPIL * I.e. ITEM 1A WILL BE DIVIDED BY ITEM 6 AND ITEM 7.

INSTRUCTIONS

GENERAL

- 1. This report is to be completed for each State, the District of Columbia, outlying areas, and the 20 largest cities at the time of the 1970 Decennial Census.
- 2. This report is due in the U.S. Office of Education on or before **December 15**, 1973.
- 3. All data are to be estimated for the 1973-74 school year.
- 4. In estimating expenditure data, include disbursements from all funds (general fund, debt service fund, etc.) and from all sources (local and county, State and Federal). Estimated expenditures should be rounded to thousands of dollars.

INDIVIDUAL ITEMS

Item 1A. The following expenditures should be included here: (1) Expenditures for ADMINISTRATION by State board of education and State department of education (excluding expenditures for vocational rehabilitation and salaries for personnel for supplementary services such as State library. State museum, teacher retirement, teacher placement, etc.), (2) Expenditures for ADMINISTRATION by county or other intermediate administrative unit, (3) Total current expenditures by local school districts [i.e., expenditures for administration, instruction, attendance, health, transportation, and net food services (including value of commodities donated by the U.S. Department of Agriculture), and other net expenditures to cover deficits for extracurricular activities for pupils], and maintenance and operation, (4) Direct State expenditures for current operation [e.g., State (employer) contributions to retirement systems, pension funds, or social security on behalf of public school employees: State expenditures for textbooks distributed to local school districts, and all other expenditures made by the State on behalf of free

public elementary and secondary schools]. Include current expenditures made for vocational technical elementary or secondary education.

Item 1B. This will include vocational technical schools which do not have an elementary or secondary program.

Item 2A. Enter the amount to be spent by the local education agencies to acquire and improve sites, construct and equip buildings, and purchase other equipment (classified as capital outlay).

Item 3A. Report here estimated interest on short term and long term debt (bonds or notes) to be paid by local educational agencies from all funds.

Item 3B. Report here estimated interest payments to be made by schoolhousing authorities or similar agencies, and payments to be made directly by State, intermediate, county, city, or other local governmental agency, where such payments will not be recorded in the local educational agency accounts.

Item 4. Report here the average salary of classroom teachers only. (Total salaries to be paid all classroom teachers divided by the full-time equivalence of the total number of classroom teachers.) Average classroom teacher salaries will not normally exceed average instructional staff salaries.

Item 5. Report here the average salary of the total professional instructional staff (total salaries to be paid instructional staff divided by the full-time equivalence of the total number of instructional staff positions).

Items 6 and 7. Report estimated ADA and ADM for all public day-school pupils enrolled in prekindergarten through grade 12, including postgraduates. Generally the ADM figure will be greater than the figure for ADA.

INSTRUCTIONS FOR COMPLETING ELSEGIS VI, PART A-4, STATE FALL REPORT ON PUBLIC SCHOOLHOUSING (OE Form 2350-7)

This report is due in the U.S. Office of Education on or before December 15, 1973. The report is to be completed for each state, the District of Columbia, the outlying areas, and the 20 largest cities at the time of the 1970 Decennial Census. Include only those schools operated by local educational agencies. If there is no entry for a field, leave blank. Avoid duplication of counting, e.g., do not count middle schools in line 2 and also include them in line 3.

For purposes of this report, a school consists of a group of pupils with one or more teachers who give instruction of a defined type in one or more grades, housed in a school plant of one or more buildings or in more than one school plant, and organized as one unit. More than one school may be housed in the same school plant, as in the case when separately organized elementary and secondary grade levels are housed in the same school plant; where this occurs, each level is considered as a separate unit, if administered separately. If both elementary and secondary grade levels are administered as a single unit, it should be considered as one school.

- Line 2. A middle school is a separately organized and administered school usually beginning with grade 5 or 6 or its equivalent and including at least three grades or years. Most middle schools presume, in ultimate plan if not in present reality, a 4 year high school for the grades or years which follow, as in a 4-4-4 or a 5-3-4 plan.
- Line 3. Include those schools not reported in lines 1 or 2, regardless of grade span, but not above grade 8. (See line 10 for those schools which have grades lower than grade 8 and include grades higher than grade 8.)
- Line 5. A junior high school is a separately organized and administered secondary school intermediate between elemen-

tary and senior high schools, usually including grades 7, 8, and 9 (as in a 6-3-3 plan) or grades 7 and 8 (as in a 6-2-4 plan.)

- Line 6. A senior high school is a secondary school offering the final years of high school work necessary for graduation and invariably preceded by a junior high school. Four-year and incomplete high schools are to be included.
 - 1. A 4-year high school is a 4 year secondary school immediately following the elementary school (as in the 8-4 plan) or a middle school.
 - 2. An incomplete high school is a secondary school which offers less than 4 years beyond grade 8 and normally ends with grade 11.
- Line 7. A junior-senior high school is a secondary school which usually includes grades 7 thru 12 and is administered as a single unit. Such a school would usually follow a middle or other elementary school with no intermediate school between.
- Line 8. A vocational/technical high school is a separately organized school for the purpose of offering training in one or more skilled or semiskilled trades or occupations. High schools offering vocational/technical as part of a comprehensive program should not be included here. (If it is impossible to count these schools separately, please enter zero here, include them as appropriate in lines 6 or 7, and explain in the comments section.)
- Line 10. Include here those schools which serve both elementary and secondary pupils, but which are organized and administered as a single unit and cannot be classified in any of the categories of elementary or secondary schools.
